<p>Please Note: It is important to give your clients a business email address. It simply makes you look much more professional. If you already have an email address, your dented web email will be forwarded to you. If you DO NOT already have an email address... whenever you get email you will be called on the phone with the information. If you have a computer, you will be set up with a business email address such as the one listed above, from which to conduct your business. Make sure you write your NAME and PHONE NUMBER in the space provided, because sometimes it is easy to forget when you are on the phone. It really does happen.</p>
